Attractions:

Arkham Escape

Embrace your dark side as you take on the role of an inmate escaping Arkham Asylum during a mass breakout. Board your trackless evacuation vehicle as you navigate through the twisted halls of Gotham's most infamous lockup, crossing paths with the city's worst villains. The whole escape is orchestrated by Gotham's greatest villains to lure Batman to the asylum and finally take him down. But Batman doesn't go down that easy, and be warned, because now he is out hunting. And tonight, he's hunting *you*.

Arkham Escape uses trackless ride vehicles to take guests through the asylum and the multitude of traps set up by Batman's rogues gallery. The ride vehicles will pass through physical sets as well as scenes that use projection mapping, animatronics, temperature and environment changes, as well as water and fog effects. This will be the only ride of its kind to have guests take on the role of an antagonist, and will be instantly intriguing to fans and non-fans alike. To have Batman positioned as a pursuing force allows a unique perspective for riders, and creates a brand new point of view when interacting with the villains themselves. Instead of attacking guests, the villains have Batman in their sights, and guests are caught in the middle of the battle.

Batwing: Firefly Flight

Board this thrilling next-generation flying roller coaster that twists and turns through the streets of Gotham, gliding over rooftops and darting through back alleys. You'll be testing out a prototype Batwing vehicle capable of carrying groups of citizens quickly out of harm's way. Unfortunately, your joyride has been interrupted by Firefly, and you'll have to

dodge his series of flaming obstacles while Batman uses your vehicle to try and bring him down.

This unique roller coaster experience will use the new generation Vekoma flying coaster, capable of multiple launch sequences, sweeping inversions, and close call thrill maneuvers. The seats on this coaster can also be positioned upright for indoor dark ride scenes, so this model is perfect for incorporating storytelling among the thrilling layout. Firefly was chosen as the villain for this attraction because of his power's physical intrigue, and because he and Batman both have the ability to fly by use of technology. This will also allow for plenty of pyrotechnic effects throughout the ride due to the nature of the character. The unique style of flying seating allows every rider to feel like they're in the driver's seat of this one-of-a-kind Batwing, and with plenty of moments that interact with guest paths and scenery, onlookers will be able to enjoy the ride as well.
